

HALDRUP SR-30

Single Row Seeder

YOUR FIRST CHOICE FOR PRECISION CEREAL SOWING

This seeder is primarily designed for sowing the first generations of cereals.

It features 4, 6 or 12 seed magazines, allowing different seed varieties to be sown in each individual row. The entire process, from the storage magazines through the distribution system and belt cone unit to the actual seeding, is completely mix-free, ensuring precise and uncontaminated sowing.

The machine is compatible with standard seed magazines, so there is no need to replace your existing ones. An integrated electronic control system manages the seeding cycle and enables plot lengths from 0.5 m to 15 m.

TECHNICAL DETAILS

Attachment	tool carrier
Number of rows	2 - 6 rows
Row distance	from 9 cm
Track width	from 1250 mm infinitely adjustable
FEEDING SYSTEM	
Single row feeding	one filling funnel per row
Central distribution	one distribution for all rows
Magazine table	4-, 6- and 12- seed magazines
COULTER SYSTEM	
Shoe coulters	Amazone
Single disc coulters	HALDRUP IS-COULTER Amazone RoTec
Double disc coulters	Lemken, Horsch

Dimensions

L x W x H from 1.9 m x from 1.8 m x from 1.8 m
Weight from 480 kg

Options

Protection against sun
Protection against wind & rain
Control system with automatic seeding
Cable system
GPS-controlled
Compressed air for fine seed & grass
