

HALDRUP SB-25

Precision Plot Seeder for
Research Trials

TECHNICAL DETAILS

Attachment	3-point hitch, tool carrier
Number of rows	from 2 up to 20
Row distance	from 9 cm
Track width	from 1250 mm
Tyres	5.00 - 15
Belt cones	290 mm diameter 2 beltcones for two plots or additional fertilizer
Continuous seeding	appr. 20 kg
Micro granulate	Dosage in the row or between the row
COULTER SYSTEM	
Shoe coulters	Amazone
Single disc coulters	HALDRUP IS-COULTER Amazone RoTec
Double disc coulters	Lemken, Horsch
Dimensions	
Length x Width x Height	from 1.9 m x from 1.8 m x from 1.8 m
Weight	from 450 kg
Options	Protection against sun Protection against wind & rain Control System with automatic seeding Cable control GPS-controlled Compressed air for fine seed or grass

The HALDRUP SB-25 is a precision plot seeder designed for experimental field trials. It features a multi-row seeding system that places seeds accurately in several closely spaced rows, creating a well-defined narrow band. This precise distribution significantly improves the reproducibility and comparability of your research data.

The machine can be configured exactly to meet your specific requirements, ensuring the optimal setup for your trial protocols.

KEY BENEFITS:

- Highly accurate multi-row seeding for consistent and reliable results
- Robust, low-maintenance construction engineered for continuous operation
- Excellent visibility and control during the seeding process
- Modular design adaptable to diverse research applications

HALDRUP SB-25 – the plot seeder engineered for precise and reproducible seeding in agricultural research.
